

Embedding You Tube Video(s) Into WordPress Page(s)

The easiest way to add video to a WordPress page is to do it via YouTube.

To be able to do this, navigate to YouTube and select the any video of your choice.

Select the appropriate video you wish to display within your WordPress page, and then copy the URL of the YouTube video as shown in diagram 1.

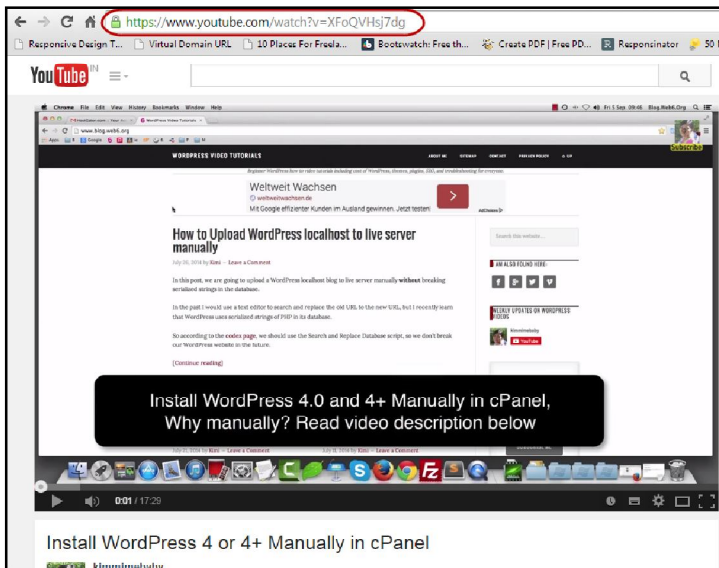

Diagram 1

Login to WordPress as administrator, by simply entering the `url_of_your_website/wp-admin` in your Browser.

Enter the appropriate username and password (*which was provided while installing WordPress*) and then click on Log In as shown in diagram 2.

Diagram 2

After logging in as WordPress Admin, the WordPress dashboard page opens as shown in diagram 3. The Dashboard provides access to different WordPress functions and features.

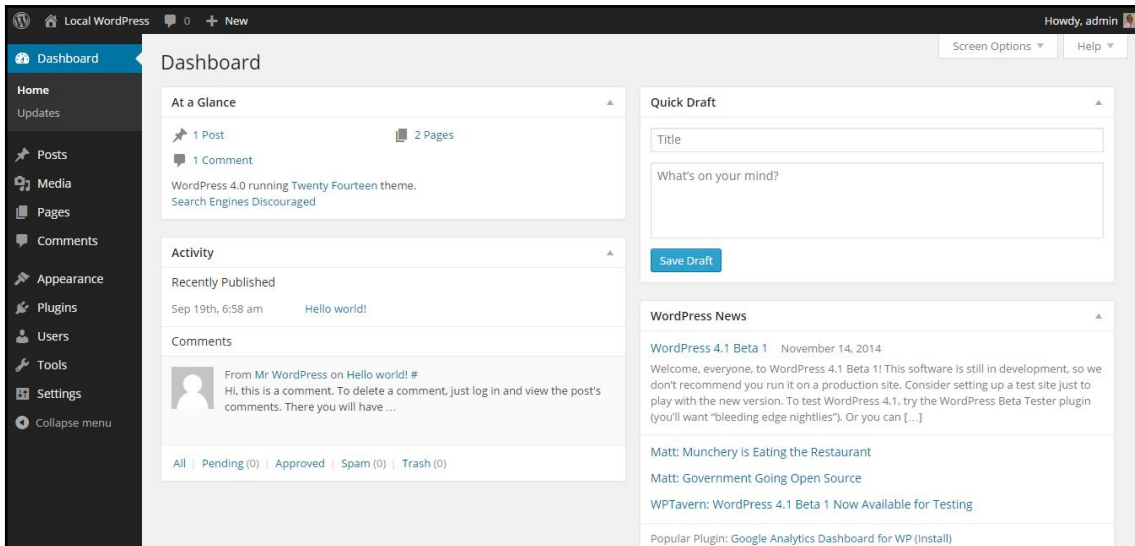

Diagram 3

In the left menu, locate the link *Pages*. Click *Pages*. From the drop down menu that appears click on *Pages* as shown in diagram 4.

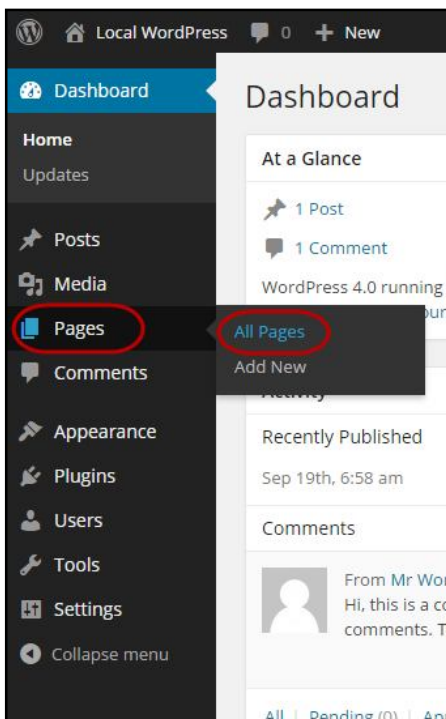

Diagram 4

Click the *Title* of the page as shown in diagram 5 or click *Edit* to open the page in its editable mode.

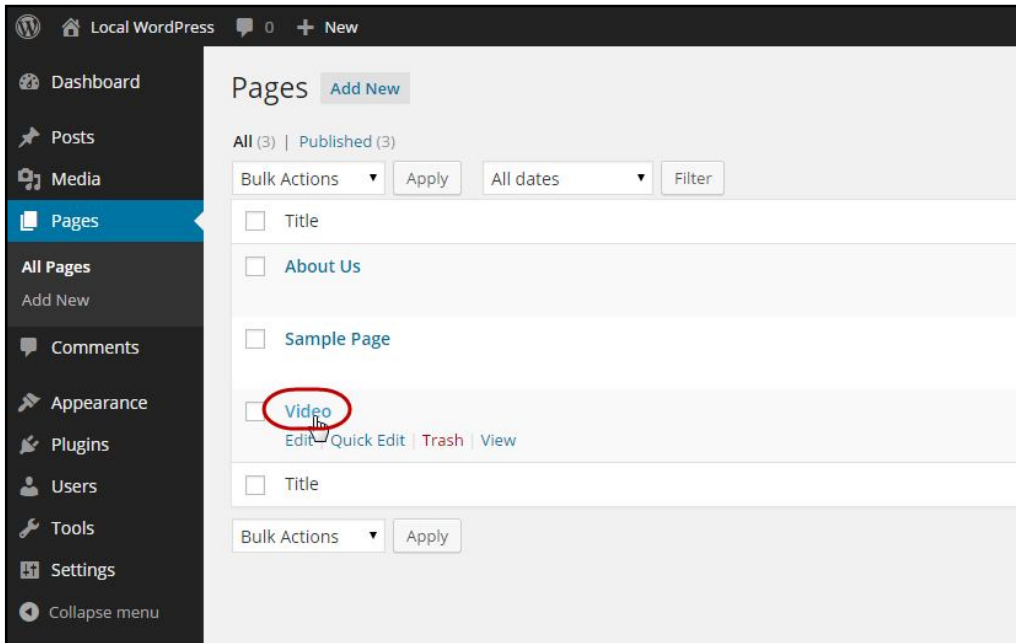

Diagram 5

Once on the page, insert the cursor where you want place the video as shown in diagram 6.

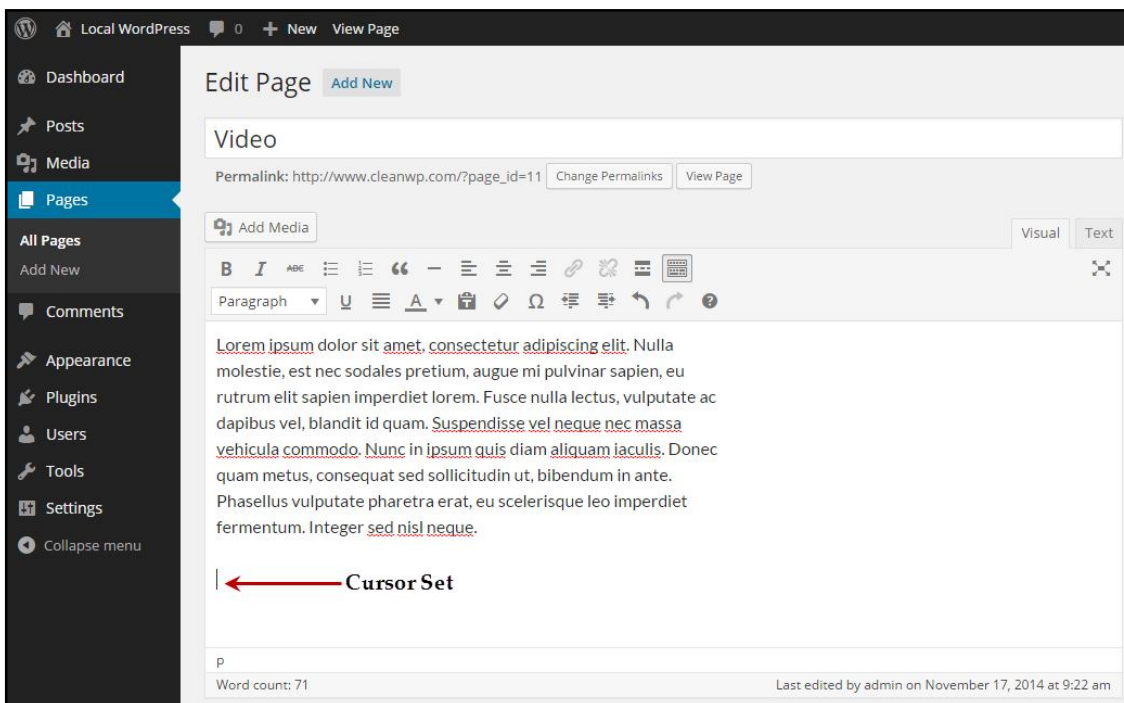

Diagram 6

In Visual view, Paste the URL of You Tube Video directly on the page.

WordPress will automatically turn the URL into a YouTube embed and provide a live preview in the visual editor as shown in diagram 7 and diagram 8.
